  Place of permanent residence, according to Article 2 of the Permanent Residence Act (NN, Nos 144/12, 158/13 and 114/22), is a place and address in the Republic of Croatia where a person settled with an intention of staying permanently in order to exercise their rights and commitments related to life interests such as family, professional, economic, social, cultural and other interests.

  Citizenship is defined as person's permanent legal relation with a state, which admits a special legal status to a person. Croatian citizenship can be obtained according to the Croatian Citizenship Act (NN, Nos 53/91, 70/91, 28/92, 113/93, 4/94, 130/11, 110/15, 102/19 and 138/21) by origin, birth on the territory of the Republic of Croatia, naturalisation and on the basis of international contracts.   Net migration of population (migration balance) is the difference between the number of immigrants and emigrants of a particular area or country in a given period of time. The contribution of migration to

overall population growth or decline is due to positive or negative net migration (net migration is positive when the number of immigrants exceeds the number of emigrants, or net migration is negative when the opposite is true).

Total net migration of population of the county is the difference between the total number of immigrants from another county and abroad and the total number of emigrants to another county and abroad.

Age of migrants is presented as an age reached at the moment of migration. Each age group includes persons who reached an age within the limits of an interval. For example, the age group from 15 to 19 years includes all persons who have reached 15 years of age and more but have not yet turned 20.
